

ZWRAP

55 Nano-Layered Stretch Wrap

Introducing ZWRAP Stretch Film

Thin But Strong

Consists of 55 nano layers, reducing the film's thickness while maintaining load stability/containment force.

Puncture Resistant

Industry leading puncture resistance especially around sharp corners.

Stretch Further

Cutting-edge German technology allows film to stretch up to 550%.

Increased Efficiency & Productivity

Wrapping machines equipped with nano film can reduce wrap time by up to 50% compared to traditional film. This is because nano film has a heightened resistance to snapping and tearing.

Less Waste, Less Cost

Engineered to utilize less material per wrap, resulting in substantial savings in pallet wrapping costs. With less film being used, landfill waste is also reduced - minimising environmental impact.

Switch to Z Wrap

Increase pallet wrapping efficiency and minimize costs by switching to the new Z Wrap Stretch Film. Get in touch with the Maxpak team for more information and to place your order.

Order Code	Dimensions	Carton Quantity
PALZ10	GW 15kg - 3000m	1 Roll
PALZ12	GW 15kg - 2500m	1 Roll
PALZ15	GW 15kg - 2000m	1 Roll
PALZ17	GW 15kg - 1765m	1 Roll
PALZ20	GW 15kg - 1500m	1 Roll
PALZ25	GW 15kg - 1200m	1 Roll
PALZ30	GW 15kg - 1000m	1 Roll
